IBIX[®] 60 HD

The IBIX[®] 60 HD is the largest and most powerful blastpot in our range, which you can work dustfree. This unit retains the convenience of the lightweight and compact design, but offers twice the power. With the outdoor tires this unit is also on rough terrain in place. The machine is completely made of aluminum and comes with a 5 year warranty.

The choice of the most appropriate blasting material and the adjustable blasting pressure make the IBIX[®] system multipurpose and capable of providing unequalled performances in innumerable fields of application, all in full observance of the operator safety and the environmental safeguard standards.

The HD (Heavy Duty) is designed with the following additional options:

- Built-in funnel (so humid blasting agent also runs well).
- Tungsten Carbide blast hose grommet (virtually no wear).
- Check valve for pressure control (prevents sand in the pressure controller).
- Intensive daily use without wearing parts, maintenance, etc.

The IBIX[®] 60 HD is designed for intensive professional use and can be used for the following applications:

- Facade cleaning.
- Paint and rust removal.
- Blasting of large metal structures.
- Mobile heavy blasting with a manageable blastpot.
